

Winter 2016

**In this Newsletter:**

[Aerial Digimap Available - Get the Picture!](#)

**Aerial Digimap Available - Get the Picture!**

Other institutions are already subscribing now.

As numerous users have already experienced the images in Aerial Digimap don't have snow cover, thankfully! The crystal clear imagery from Getmapping is 25cm resolution vertical aerial photography, the most detailed national coverage available. The largest proportion of the imagery dates from post-2011 with updates due every year.

Aerial Digimap has a mapping and a data download facility, familiar to those who already have access to other Digimap Collections.

If your institution subscribes you can access the service here: <http://digimap.edina.ac.uk/aerial>

If it doesn't register your interest with your site rep: <http://bit.ly/DigimapSiteReps>

**New OS Network Data**

You can now download Ordnance Survey's latest datasets, OS MasterMap Highways Network and OS MasterMap Water Network layers.

Click the link below to find out about these new datasets:

**Recent Data Updates**

We have updated several datasets in the last few months as well as adding the network datasets.

Have a look at the links below for more details:

October Updates: [READ MORE](#)

November Updates: [READ MORE](#)

**Winter Holiday Availability**

From December 23rd 2016 to January 4th 2017 there will be very limited help desk cover.

While we will ensure the service continues to run smoothly over this period, any non-urgent queries may not be answered until we return.
