

Your tasks:

1. Open Global Roam.
2. Change **Basemap** to World Panorama.
3. We will add a Web Map Service of elevation, provided by the European Environment Agency. [Check out all the possible WMS they offer.](https://land.discomap.eea.europa.eu/arcgis/services/Elevation/Elevation_Breakdown_2012_1km/MapServer/WmsServer)
4. Select **Overlays** from the sidebar.
5. Select **WMS**.
6. Select **Manually Add WMS Feed**.
7. Copy and paste this URL:
https://land.discomap.eea.europa.eu/arcgis/services/Elevation/Elevation_Breakdown_2012_1km/MapServer/WmsServer
8. Select **Get Layers**.
9. Select **Add Layers to Map**.
10. Your map should be displaying elevation data over Europe. Your overlays menu will show the WMS details – see image on next page.
11. Change the opacity of the elevation mapping by moving the slider bar left and right.

Web Map Service of elevation in Global Roam
